

The West Sound Beekeepers Association will capture and collect honeybee swarms

## If you get a swarm call...

The listed beekeepers are members of the West Sound Beekeepers Association and are willing to pick up swarms of HONEY BEES at no charge if the bees are a reasonable distance from the beekeeper and the bees are not too embedded into a structure such as walls, chimneys, etc. All efforts should be made to report the swarms and have them picked up **as soon as possible** before they move into undesirable places.

### Zone A Silverdale/Bremerton

**Jason Deal**  
Bremerton  
360-373-6587 (h) 360-551-9792 (c)

**Stan Jorgensen** 2 3  
Poulsbo

## Procedure...

**1** Give the phone number of two to four beekeepers in the appropriate Area Zone closest to the location of the call. The names in bold at the top of the list are most often available to respond quickly. Tell the caller to leave a message if the beekeeper is not home.

**2** All beekeepers on this list will remove bees. If the call is about removal of yellow jackets, wasps, bumble bees or embedded bees *can usually be removed without toxic chemicals by a beekeeper*. Use the following code to select the appropriate beekeeper who may do the additional tasks, *sometimes for a fee*.

### 3 Specialist Codes...

- 1** Will remove hornets, wasps, yellow jackets and bumble bees
- 2** Will travel some distance to remove bees
- 3** Will remove insects from structure
- 4** Will remove insects and repair structures if requested.

### Zone C Hansville

**Paul Lundy/Lisa Knox**  
Kingston  
360-297-6743 (h) 206-954-9276 (c)
